Records Disposed of at Center	16 " "
Records Transferred from Center	10 " "
	<hr/>
Total :	49 cu ft

Accessioning and Disposal

One hundred thirty-five assembled boxes were furnished to three operating components. To date 4,413 assembled boxes have been furnished.

The revision of the NIS Gazetteer on USSR has been completed and sent to the printer. The revision will consist of seven volumes. Volumes one and two have been received and the remaining five are scheduled to be received on a weekly basis. These first two volumes required 245 cubic feet of shelving space and it is estimated that the entire gazetteer will occupy 850 cubic feet.

Two accessions have been received from the Special Records Branch of Security. These are very sensitive records and were not on the Security Records Control Schedules. After discussing this with the ARO, he agreed to contact Records Disposition Branch to include these records in the schedule.

During the week 77 cubic feet were destroyed leaving an accumulation of 751 cubic feet in the disposal area.

CONFIDENTIAL

REPORT FOR WEEK ENDING 18 May 1959 FROM RECORDS CENTER

Reference

All the Intellofax cards have been returned to OCR/MD for merging into one complete inactive file. As soon as the merging action has been completed, the cards will be returned to the Center. Approximately 3,500,000 cards are involved.

Vital Materials

Agreement has been received from [ ] to discontinue duplicate reporting of TS material deposited and withdrawn.

25X1

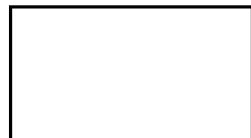

One extra step has been eliminated in the withdrawal of NIS map negatives. Under the new procedure, Records Center personnel will hold the control records for the negatives and all requests will come direct to the Records Center instead of by way of the VM Repository.
